

Remote Learning Basics for Students

Demo Videos and other help available here:
bit.ly/nscstudentremotelearning

About Normandy Student Devices:

- In order to access digital learning resources, you must first make sure that your device is connected to a WiFi network.
- Students will need their Google Username and Password to log in to their Chromebook and most digital learning resources. **Teachers have access to this information and will provide it to students.**
 - The student Google account begins with a ten-digit student ID number and ends with @normandysc.org
 - The student password is the birthdate (in the following format MMDDYYYY) and then the student first and last initials, in all capital letters. For example: 03232008AB

The Clever Portal - Access to Digital Learning Resources:

- Most of our digital learning resources are available through the **Clever Portal** at bit.ly/cleverportal. Alternatively, visit the www.normandysc.org website and click the “CLEVER PORTAL” link in the top menu bar.
- The Clever Portal is the single sign-on for multiple digital learning resources using the student’s Google username and password.

Google Classroom- The Student-Teacher Virtual Classroom Space

- To access Google Classroom, click the Google Classroom icon after logging in to the Clever Portal.
- If you are not already enrolled in a virtual class in Google Classroom, your teacher will send you an invitation to join your class. You can accept this invitation in your student email account or in Google Classroom itself.

For safekeeping, jot down your Google username and password here:

Username: _____@normandysc.org

Password: _____
